

## Quiz Trail

Remember to add your quiz to [www.pub-quiz.com](http://www.pub-quiz.com) for FREE advertising

1) Read out the questions in order from 1 to 24.  
Teams write their answers in any hexagon on the right of the sheet along with the corresponding number. They should also write the answer on the left of the sheet against the corresponding number and the number in the right place in the bottom left of the sheet

2) After a short break you collect the left hand side of the team's answer sheets then you begin reading out the answers in the order given on the answer sheet.

First read the number, then the question followed by the answer, then the number again.

3) If incorrect or unanswered, teams cross through the answer and are not able to use that hexagon..

4) The winning team is one who has a line of joining answers from any of the four shaded squares on the left to any of the four shaded squares on the right. All hexagons containing a correct answer must touch an adjacent hexagon containing a correct answer on at least one side.

5) After a 'BLOCKBUSTER' call, check the duplicate copy.  
If correct, they win, if incorrect, continue playing.

6) In the event of a tie or if no team wins when all answers have been read out, use the tiebreak question.

7) After a winning claim, remember to read out the answer to all remaining questions. You might want to give a small prize to the player or team with most correct answers

### Quiz Trail Questions

- 1) Which actress has appeared in *Boogie Nights*, *The Guru* and *The Hangover*?
- 2) Who was assassinated while attending a Washington theatre in 1865?

# Quiz Trail

The quiz master will call out questions from 1 to 24 – write the number of the question and the answer to it in ANY hexagon and copy the answer against the correct number above left. Also write the numbers you use in the corresponding hexagons bottom left.

Once all questions have been read out, tear off the left hand side and hand to the quizmaster. They will now read out the answers in a random order – you need to get a straight line of connecting answers from any of the four shaded squares on the left to any of four squares shaded squares on the right – once you have them shout “BLOCKBUSTER” and the quizmaster will check your sheet – Good Luck. Anyone seen with a mobile phone will have it smashed to pieces with a hammer and will be disqualified!
